## GENERAL INSTRUCTIONS

---

1. There are two telephone switchboards in operation at this Camp — the Camp Switchboard, serving all military activities; the Hospital Switchboard, serving the Hospital Area. All numbers in the 1100 and 1200 Blocks are on the Hospital Switchboard.

2. Inter-communication facilities have been installed, so that both switchboards may be reached from all working extensions. When calling the Hospital Area from a line off the Camp Switchboard, ask the operator for the Station Hospital, and vice versa.

3. This Directory is published for your convenience. Please refer to it whenever possible and eliminate unnecessary calls. In the event any number listed is incorrect, please call "Directory Section — Ext. 303."

4. In accordance with the provisions and instructions contained in War Department Circular 222, it is necessary that all personnel assigned or employed on this Post familiarize themselves with the condensed instructions contained herein.

### CLASSIFICATION AND USAGE OF TELEPHONE

---

a. All telephones in use on this Post fall into one of the following categories:

- (1) Class A—Having access to city trunks for all types of calls relative to official Government business only.
- (2) Class B—Having access to city trunks for all types of calls, the costs of which are not chargeable to Signal Corps Funds.
- (3) Class C—Restricted to inter-Post communication only.
- (4) Class D—Restricted not only as in Class C phones, but to special types of service, such as Fire Alarm, etc.

b. This Camp will attain a maximum development of Class C telephones, with total restrictions involved. A continual survey will be made by the Signal Officer with this idea in mind, and re-classification of telephones will be effected when deemed necessary.

c. All new connections, other than Class B or D telephones, will be installed as Class C lines, unless written request stating the military necessity is approved by the Commanding General for an "A" classification.

d. All requests for the re-classification of C telephones will be written and submitted as in c. above.

e. Working lines and bridged instruments, upon being vacated, will be immediately reported to the Signal Office for disconnection.

f. Whenever large groups of civilians or enlisted personnel have access to telephones, such telephones should be Class C in every possible instance, where this classification will not interfere with the transaction of official Government business. Class A telephones should serve only Division, Regimental, and Branch heads, or delegated responsible individuals.

g. Class A telephones will be used for official business only and will not be used for personal telephone calls.

5. The following operating procedures will be strictly adhered to by all telephone users:

a. The Army operators will request you to limit your toll calls to five (5) minutes' duration. It will be the telephone user's responsibility to comply whenever possible.

b. When placing a toll call, it will not be necessary in the future, to ask for the toll operator. The calling party will give the following information directly to the operator answering his signal:

- (1) State whether the call is "official" or "personal."
- (2) The called point.
- (3) The called number and the name of the called party.
- (4) Whether the call is "person-to-person," "station-to-station," or "collect."

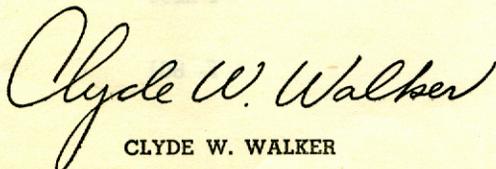

## GENERAL INSTRUCTIONS

- b. (5) The name of the calling party and the name of person authorizing the call.
- (6) The calling extension number.
6. On delayed toll calls, when the Army operator initiates subsequent attempts, she will hold the calling party's line. If the calling party attempts to make a call from a line thus held, he will be informed by the Army operator that "The line is being held for a toll call." If the calling party insists upon placing other calls during this interim, the Army operator will accept them but will suspend all work on the toll call, and subsequent attempts will not be again made until all existing toll calls have been placed or completed.
7. Extension users, wishing to make inquiry concerning any delayed toll calls which they have filed, will ask for the "Delay Operator," who will give all information pertaining to their call.
8. Telephone users will not accept personal incoming collect calls, nor will they advise others to place this type of call to this establishment. Acceptance of official incoming collect calls will be permitted; however, this type of call will be kept to an absolute minimum.
9. Originating calls will be placed by number. Reference will be made to telephone directories. This applies to all inter-communicating calls and, wherever possible, to local, city, and toll calls. If you wish to attract the attention of the operator, flash the receiver button slowly. A rapid flash will not register on the switchboard. Upon completing the call, place the receiver on the hook or in the cradle so that the line will not be left open. If it is, you will not be able to receive any calls.
10. Upon filing a call, the calling party will hold the line until the call is completed—a "Busy" or "Don't answer" report is received—or until dismissed by the Army operator.
11. Operators will not be requested to locate persons. Telephone users will locate an individual who may be at one of several places by originating calls to the location involved.
12. Army operators will not be requested to try a number and call back when the person or number becomes available. On inter-communicating calls and local city trunk calls, when the called party or number is not reached, the telephone user will initiate his own subsequent attempts. On toll or long distance calls the telephone user will be guided by instructions received from the Army operator.
13. Army operators will not be requested to intercept incoming calls for completion to a line other than the regularly assigned line for the individual concerned. When a telephone user leaves the premises of his listed telephone, word should be left as to where he can be reached or when he will return. Incoming calls for an individual can normally be handled on a call-back basis by whomever answers the telephone; important toll calls may be transferred.
14. Service Criticism.
  - a. Do not reprimand the operator, or distract her with a complaint. In the event you are rendered any discourtesy, or other forms of inefficiency, simply ask for the operator's number and send it along with your report to the Camp Signal Office.

By command of BRIGADIER GENERAL LADD:

CLYDE W. WALKER  
Captain, AGD  
Adjutant

OFFICIAL:

CLYDE W. WALKER  
Captain, AGD  
Adjutant
